

There *is* such a thing as a free lunch.

The best things in life *are* free.

See for yourself.

**Linux Install Fest & Demo Day
Saturday, November 03**

**Rooms 205 & 203
Lory Student Center
Colorado State University
Fort Collins
Noon – 4pm**

4th Annual Linux Install Fest & Demo Day

Linux is a free and stable operating system that comes with 1000s of free applications.

Play **free games**, use **free office applications**, work with **free scientific software**. Once you have Linux, you can **learn marketable IT skills** like running a web server, or programming.

We will even do the hard work for you and install the software on your computer.

Total cost to you? NOTHING! When was the last time you heard that in IT?

Just bring your computer (we supply the monitor, keyboard, mouse, and the expertise) to the Lory Student Center, this Saturday.
