center

music where you
want it to be

discover, organize
create and enjoy
your digital
music collection
in the comfort
of your living room

invent

experience your music

The HP Digital Entertainment Center helps you get the most out of your music collection.

Now you can easily store and organize your CDs and MP3s.

Plus you can create personalized playlists, burn custom CDs, transfer to select portable digital music players and listen to internet* radio (not compatible with AOL® and certain other ISPs)—all from the comfort of your living room.

in a whole new way

introduce your stereo to the internet and your CDs to the storage closet

The HP Digital Entertainment Center works with your home stereo system, TV and internet* connection to put your music at your fingertips.

- easily store and automatically catalog your music—up to 750 CDs, up to 9,000 tracks*
- enjoy playlists of your favorite music
- burn your favorite music to CD with the built-in CD-writer
- transfer music to select MP3 players, handhelds and memory card readers
- discover new music through a variety of internet* radio stations

it's so easy, you can do it from the couch

- listen to a track while you're saving it to your library—your track will be recorded long before you hear the final note—or listen to internet* radio while you update your playlists
- when you want to take your music with you, use the built-in CD-writer to burn a custom CD or connect a select MP3 player, handheld or memory card reader to one of the USB ports and transfer the tracks you want
- your personal music library is simple to access and update—just click through your music selections with the easy-to-use remote control
- see your music selections and menus displayed on your TV
- or if you prefer not to turn on the TV, view menu options and album information on the front display
- press the info button on the remote control to see artist biographies and album information, plus lists of artists' recordings and of similar artists

discover new music at home

- sample and acquire new music and listen to internet* radio in your living room
- tune in to internet* radio stations worldwide—search by country, city, language, station name or call letters
- create lists of your favorite internet* radio stations for easy access, or try one of three featured stations updated regularly
- explore the internet* guide for a variety of entertainment content, including music videos, movie trailers, artist interviews and featured music you can download, plus information on new services and product features
- connect the way you want—works great with dial-up internet* providers, broadband and home networks
